

We lead your security. And we actually build the AI.

AEGYS is a boutique firm for mid-market teams: fractional security leadership paired with hands-on AI implementation and training. One team that can own your security program and put AI safely to work.

Lead your security vCISO ownership: strategy, compliance, board reporting, vendor and incident risk.	Build the AI Hands-on implementation in security and IT workflows, where it earns its place.	Train your team Practical workshops for the SOC, IT, and leadership.
--	--	--

Why teams call us

- Traditional vCISOs rarely understand how to deploy AI safely.
- Generalist AI consultants rarely understand security, compliance, or threat modeling.
- You get both in one team, with no salespeople in between.

Start with a Security & AI Posture Assessment

A short, structured look at where your security program stands and how ready you are to adopt AI, with a prioritized roadmap you can act on. Reach out: secure@aegys.io · aegys.io
